1 Heatmap – Speed variation for a single sensor

This task corresponds to Appendix B. The figure shows how the average speed varies during time of day (x-axis) and across days (y-axis) for sensor E4S 58 140. A clear congestion pattern can be observed in the afternoon (15:30–17:30).

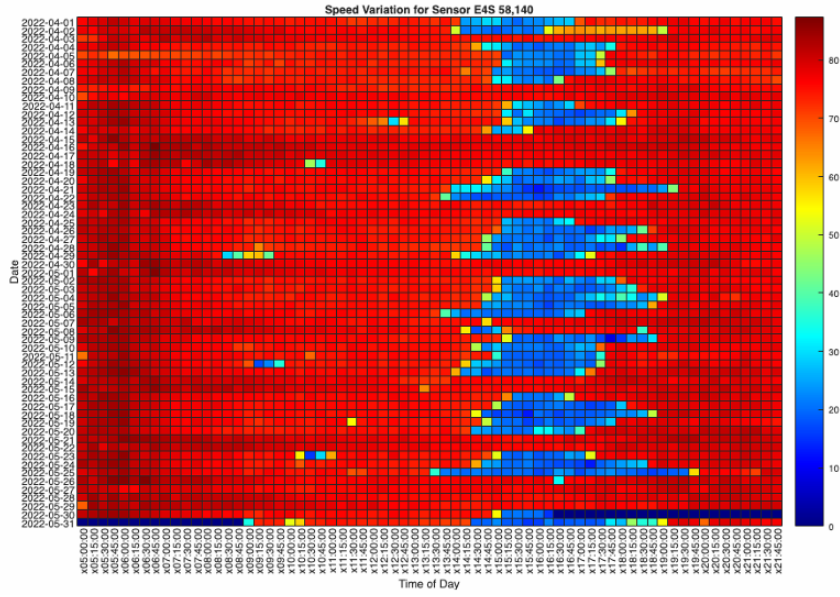

Figure 9: Plot for how speed varies during time of day (x-axis) and between days (y-axis) for sensor E4S 58,140.

Figure 1: Speed variation for sensor E4S 58 140.
